## SUMMARY

React JS Developer with 3 years of experience in building responsive web applications. Proficient in **React, Redux, Python, Django** and **Firestore**, with a strong focus on **UI/UX design** and **seamless API integration**. Skilled at creating dynamic, user-friendly interfaces while ensuring performance and scalability.

## EXPERIENCE

- **Agriculture Insurance Company of India Limited** September 2022–Present  
*Software Developer* Delhi, India
  - Designed and implemented the front end of SARUS, an in-house software for **managing agriculture risk and insurance claims**, enabling regional officers to efficiently review and process farmer insurance applications.
  - Created responsive and user-friendly interfaces using React for **enhancing the user experience for regional officers**.
  - **Collaborated with backend developers to integrate APIs**, ensuring seamless data flow and synchronization between the front end and server.
  - **Implemented role-based access controls**, allowing regional officers to securely access and manage insurance claims based on their permissions.
  - **Optimized data flow with Redux**, resulting increase in overall performance.
  - Technologies used : **React JS, HTML, CSS, Javascript, Django, Python**
- **Ganit Inc.** March 2022–August 2022  
*Developer Intern* Remote
  - **Created the user interface for PCA** (Passion Contribution Attitude), an employee appraisal software.
  - Enabled employees to **track the status of their appraisal forms** (pending, approved, or rejected) within the system.
  - Collaborated with the backend team to design and implement scalable RESTful APIs.
  - Developed dynamic UI components using JavaScript and React, increased user engagement.
  - Technologies used : **React JS, HTML, CSS, Javascript, Redux-toolkit**

## EDUCATION

- **Institute of Management Studies** July 2019 - August 2021  
*MCA (Master's in Computer Applications)* Ghaziabad, India
- **School of Management Sciences** June 2016 - March 2019  
*BCA (Bachelor's in Computer Applications)* Varanasi, India

## PROJECTS

- **Meal Mastermind** Web-link  
*Tools: React JS, Redux-toolkit, Firebase (database, authentication, hosting), Spoonacular API, Material UI*
  - Meal Mastermind provides a platform for users to **discover and share recipes**.
  - Built recipe management features enabling users to **save, edit, and share their favorite recipes**.
  - Enable user to create their own recipes and save them.
  - Developed user **authentication with Firebase**, enhancing data security and user convenience.
- **Personal Finance Manager** Web-link  
*Tools: React JS, Redux-toolkit, Firebase (database, authentication, hosting), Material UI, Ant design, Framer motion*
  - The Personal Finance Manager is a React-based web application designed to help users effectively track and manage their monthly spending and savings.
  - **Income and Expense Tracking:** Easily record and visualize income sources and categorized expenses.
  - **Firebase Integration:** Secure user authentication and real-time data storage using Firebase.
  - **Customizable Dashboard:** Quick access to key financial metrics and modules like income, expenses, savings, and reports..

## SKILLS

- **Languages:** Python, JavaScript, HTML, CSS
- **Frameworks:** React JS, Django
- **Tools:** VS Code, Redux, Postman, Git
- **Web Technologies:** API Integration, Material UI, Bootstrap, Firebase
- **Methodologies:** Agile, SCRUM
